INTERNATIONAL

MARITIME

SERVICES PTY LTD

International Maritime Services P/L (IMS) specialises in all maritime logistics for commercial, defence and private vessels throughout the world.

***We have commissioned and delivered more high-speed ferries than any other company in the world!***

Kim Cleggett, director of IMS, commenced work in the maritime industry in the mid 1970s and has been driving state of the art high-speed ferries since 1982. His first high-speed ferry delivery was in 1985. Since then Kim and IMS have delivered dozens of ferries, motor yachts, workboats, fishing boats and patrol vessels throughout the world.

Due to the quantity of new-build vessels that we commission and deliver, we have an intimate knowledge in the use of the latest bridge and engine-room electronics. Having this experience with various manufacturers and models of equipment means we can join each vessel with the minimum of fuss or handover requirement. As a bonus we specialise in vessels with water-jet propulsion systems.

**IMS Australia is just a phone call, email or flight away from anywhere else on the globe. Australia's exchange rate enables us to offer our services at the most competitive prices, so no matter where you are situated, please take the time to contact us and request a quotation. We will get back to you within 24hours.**

#### **Services for commercial and defence vessels:**

- Commissioning trials including FMEA and class trials
- Crew training and type rating of crew and vessels to specific routes
- Owners representation during the building/ refitting of a vessel
- Writing shipbuilding agreements and vessel specifications
- Delivery logistics – any vessel any where
- Advising operators in the operation of high speed aluminum ferries & newly established ferry routes
